

CUSTOM CONTROLS DIVISION

CONTROL PANELS MADE RIGHT

When the mission involves making a variety of electrical components work together to control a process, a machine or an assembly... chances are that control panels play a vital role in your operation. And when it comes to top-quality control panels, no one builds them better than Winkle Electric's Custom Control Division.

With over a half-century of experience, state-of-the-art equipment and the very best components, Winkle has what it takes to get it done right—right from the start.

“Not a month passes without another electrical firm soliciting our business. But the trust, reliance, quality and close-working relationship between Fleming Steel and Winkle Electric makes the thought of deviating unthinkable.”

» *Seth Kohn, Fleming Steel Company*

FROM CONCEPT TO INSTALLATION

At Winkle Electric, we understand that building a first-rate control panel is just part of a complex process that ultimately results in a solution that meets or exceeds our customers' critical needs.

That's why our experienced Custom Control team works with your technical staff every step of the way—from the initial design to the final installation and testing.

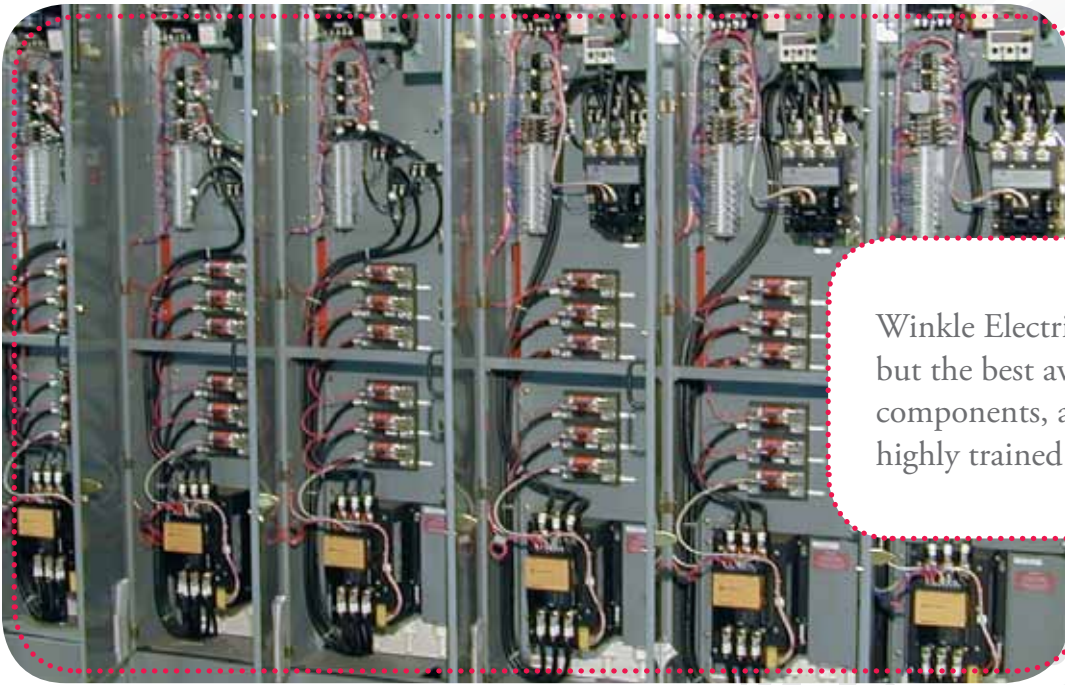

Winkle Electric's Custom Control Division is able to partner with your organization's design team or with any third-party systems integration specialist you choose. Our experienced team is also able to provide custom design services for a variety of applications.

The logo for Winkle Electric Company, Inc. features the word "Winkle" in a stylized, red, cursive font. A white, stylized electrical plug or socket symbol is integrated into the lettering, with its prongs pointing upwards and to the right.

Winkle Electric uses nothing but the best available components, assembled by highly trained technicians...

QUALITY COMPONENTS

Winkle Electric uses nothing but the best available components, assembled by highly trained technicians to create control panels that integrate flawlessly with the most demanding applications.

Many of the components we use come from the over \$2 million on-site inventory of our Electrical Supply Division, which helps to reduce lead time, control costs and ensure the quality of the finished product.

THE TOTAL PACKAGE

Winkle's Custom Control Division is complemented by our three other divisions, Electrical Supply, High-Tech Automation and Integrated Services. Together, our four divisions stand ready to recommend and implement the solutions you need, just when you need them most.

...to create control panels that integrate flawlessly with the most demanding applications.
